REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: **the specific limitations of** "machining the bore with a honing tool through a second forward stroke and a second return stroke in which the axial speed is increased and the rotational speed is decreased, such that crosscut tracks are produced at a greater angle from perpendicular than the machining tracks from the first forward stroke and first return stroke, wherein the crosscut tracks are made to a substantially same depth during the second forward stroke and the second return stroke" in the combination as claimed in **claim 2**, are not anticipated or made obvious by the prior art in the examiner's opinion. **For example**, Nagel (6,012,973) discloses a method of honing inner surface (11) of a cylinder (12) with honing tool (20) comprising the following steps: machining the said inner surface (11) of a cylinder (12) with a honing tool (20) driven both in a rotary (18) and in an axially reciprocating (19) manner (i.e. one stroke and return stroke); and increasing a ratio of axially reciprocating speed to the rotational speed of the tool compared with the normal ratio honing tool during machining. **However**, the art of record considered as a whole, alone or in combination fails to provide or suggest "machining the bore with a honing tool through a second forward stroke and a second return stroke in which the axial speed is increased and the rotational speed is decreased, such that crosscut tracks are produced at a greater angle from perpendicular than the machining tracks from the first forward stroke and first return stroke, wherein the crosscut tracks are made to a substantially same depth during the second forward stroke and the second return stroke".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Ojini whose telephone number is 703 305 3768. The examiner can normally be reached on 7 to 4 Tuesday-Friday with every other Monday off.
